I drive a truck and depend on the instant traffic and weather reports when I am traveling. This helps me to know the road conditions and helps me to travel safer in my job. I pay to listen to the XMradio and do not think that the NAB should be the one deciding what I can listen to. The XMradio broadcasts where other radios cannot. There is a big variety of programing with XM and this helps all the truckers across all of the states. The weather and traffic channels are needed to provide us withup to date information. We should not have to wait for the hour or half hour reports that are outdated on the regular radio.I urge the FCC to reject the NAB's petition and let the truckers and others decide what what they want to listen to.
